MEMORANDUM FOR: Deputy Director (Support)

SUBJECT: Operational Program, FI and CI Staffs, FY '56 and '57

1. A review by the DD/S support components of subject operational programs resulted in the issuing of confirmation to the DD/P Review Board that:

a. Adequate budgetary provision appears to have been made in the operational programs for the support requirements inherent therein.

b. No support requirements appear to exist in these programs of such magnitude or extraordinary nature as to require adjustment of the support capabilities of the DD/P components.

25X1A2g

2. As indicated in Attachment "A", FI Staff contemplates a project [REDACTED] which appears to require substantial numbers of personnel and materiel needs. These requirements have not previously been analyzed or brought to the attention of the support components. In the discussion at the DD/P Review Board meeting, FI Staff indicated that although the support requirements had not as yet been sufficiently identified to permit specific identification and costing, adequate funds have been provided in the program to cover total costs. FI Staff also indicated that they would develop specific support requirements with the support components at the earliest practicable moment.

3. In respect to the FRC review of these programs, it is believed that no reservations or qualifications with respect to support of the programs are necessary.
